

# Fairy

## Directions

1. Color and cut out the fairy.
2. Glue the fairy to a small clothespin. You can make her look like she is flying by hooking the clothespin to parts of the house.

If you don't have a clothespin, you can attach the fairy to the house with a paperclip.

You can also use the stand below for a standing fairy. Glue the small parts together to make a triangle. Then glue one long side of the triangle to the fairy.
